

Upgraded

Upgrade

used in the context of technology, anything can be upgraded; improved. Often an update is an upgrade but not always. Update only implies newer; more up-to-date

Upgrade is the process of improving something by replacing part of it or adding additional parts, and it refers to the result of the process. For example, one can upgrade a computer by replacing the CPU with a faster one and by adding more RAM, and afterwards, the computer is an upgrade. Although often used in the context of technology, anything can be upgraded; improved.

Often an update is an upgrade but not always. Update only implies newer; more up-to-date. An update could degrade, or changing to an older version could be an upgrade.

Macintosh Processor Upgrade Card

PowerPC 601 CPU and plugs into the 68040 CPU socket of the upgraded machine. The Processor Upgrade card required the original CPU be plugged back into the

The generically named Macintosh Processor Upgrade Card (code named STP) is a central processing unit upgrade card sold by Apple Computer, designed for many Motorola 68040-powered Macintosh LC, Quadra and Performa models. The card contains a PowerPC 601 CPU and plugs into the 68040 CPU socket of the upgraded machine.

The Processor Upgrade card required the original CPU be plugged back into the card itself, and gave the machine the ability to run in its original 68040 configuration, or through the use of a software configuration utility allowed booting as a PowerPC 601 computer running at twice the original speed in MHz (50 MHz or 66 MHz) with 32 KB of L1 Cache, 256 KB of L2 Cache and a PowerPC Floating Point Unit available to software. The Macintosh Processor Upgrade requires and shipped with...

Stuttgart–Augsburg new and upgraded line is a proposed German railway project.

The 2003 federal transport plan included it as an urgent project. It includes a new high-speed line between Stuttgart and Ulm with a maximum speed of 250 km/h, parallel to the existing Stuttgart–Ulm line and an upgraded Ulm–Augsburg line with a design speed of up to 200 km/h. On 19 July 2007 it was announced by the Federal Government, the State of Baden-Württemberg and Deutsche Bahn AG that the project had been officially approved. The estimated cost of the whole project is € 4.088 billion, with funding to be provided by Deutsche Bahn (€ 1,469 million), Federal Government and the European Union (€ 1,229 million), Baden-Württemberg (€ 824 million), Stuttgart city (€ 239 million) Stuttgart region (€ 100 million)...

"Upgrade U" is a song by American singer Beyoncé from her second studio album B'Day (2006). It features additional vocals from rapper Jay-Z. It was composed by Swizz Beatz, Cameron Wallace, Beyoncé, MK, Makeba, Sean Garrett, Angela Beyincé, Jay-Z, Willie Clarke, Clarence Reid, and Beyoncé's sister, Solange. Columbia Records released "Upgrade U" as a promotional single on October 8, 2006 in the United States only. "Upgrade U" draws from the genres of hip hop and R&B. The concept of the song is that of a woman describing herself as the key to upgrading a man's lifestyle.

"Upgrade U" was generally well received by music critics, some praising Beyoncé's assertiveness while singing about her ability to improve her man's life (to one of extravagant luxury) with her presence. Many also praised the...

Transpennine Route Upgrade

Grayling said the upgrade would continue. As of 2021[update], ten years after the Autumn Statement announcement, the line was still being upgraded in stages.

The Transpennine Route Upgrade (TRU) is a major investment being made in the railway between York and Manchester via Leeds and Huddersfield in the north of England. It is the 76 miles (122 km) northern route over the Pennines, most of which is also known as the Huddersfield line. As of 2024, the line is heavily used but is slow and lacks capacity. It has Victorian infrastructure, covers difficult terrain including the 3-mile (4.8 km) Standedge Tunnel, and has poor access roads.

Since the closure of the Woodhead line, there are three remaining transpennine rail lines that connect Lancashire and Yorkshire. To the south of the Huddersfield line is the Hope Valley line which traverses even more difficult terrain including the 3.5-mile (5.6 km) Totley Tunnel, and which in 2021 was allocated £137...

Midland Main Line upgrade

using electric traction, the line from Bedford to St Pancras is also being upgraded which includes boosting the power supply. Parts of the line have been classed

The Midland Main Line (MML), a major railway line in the United Kingdom, has been undergoing various upgrades since 2015. The current programme of upgrades began in 2012, although electrification was proposed a number of times previously. The current programme includes electrification of the railway line between Bedford, Wellingborough, Corby, Leicester, Derby, Nottingham and Sheffield. The routes between Nottingham and Sheffield and the Erewash Valley line were not included at this time, only the line between Derby and Sheffield. The upgrade was part of the HLOS (High Level Output Specification) for Control Period 5 published by the UK Government in 2012.

To enable all the benefits of using electric traction, the line from Bedford to St Pancras is also being upgraded which includes boosting...

Upgrade (film)

from the video. Grey breaks into Serk's home and finds proof Serk was "upgraded" through a secret military experiment, also connecting Serk to a local

Upgrade is a 2018 cyberpunk action horror film written and directed by Leigh Whannell, and starring Logan Marshall-Green, Betty Gabriel, and Harrison Gilbertson. Upgrade follows a technophobe who is implanted with a chip that allows him to control his body after a mugging left him paralyzed. The film was produced by Jason Blum, under his Blumhouse Productions banner.

After premiering on 10 March 2018 at South by Southwest, Upgrade was released on 1 June 2018 in the United States by OTL Releasing and Blumhouse Tilt, and on 14 June in Australia. The film made \$17

million on a \$3 million budget and received positive reviews from critics, who called it "one part The Six Million Dollar Man, one part Death Wish revenge fantasy", and praised its dark humor and action sequences.

Solid Rocket Motor Upgrade

The Solid Rocket Motor Upgrade (SRMU) was a solid rocket motor that was used as a booster on the Titan IVB launch vehicle. Developed by Hercules (later

The Solid Rocket Motor Upgrade (SRMU) was a solid rocket motor that was used as a booster on the Titan IVB launch vehicle. Developed by Hercules (later ATK), it was intended to be a high-performance, low-cost upgrade to the UA1207 boosters previously used on Titan IV. Wound from carbon-fibre-reinforced polymer and burning a hydroxyl-terminated polybutadiene-bound ammonium perchlorate composite propellant, it was an ambitious upgrade building on Hercules' experience developing a filament-wound case for the Space Shuttle SRB. Originally intended to fly in 1990, it instead first flew in 1997 due to a protracted development and lack of demand. The SRMU performed successfully on all of its flights.

Slum upgrading

Slum upgrading is an integrated approach that aims to turn around downward trends in an area. These downward trends can be legal (land tenure), physical

Slum upgrading is an integrated approach that aims to turn around downward trends in an area. These downward trends can be legal (land tenure), physical (infrastructure), social (crime or education, for example) or economic." The main objective of slum upgrading is to rehabilitate them into functional neighborhoods by addressing the social needs of the community, and improving integration into the formal urban economy.

Slum upgrading is used mainly for projects inspired by or engaged by Commonwealth Bank and similar agencies. It is considered by the proponents a necessary and important component of urban development in the developing countries. Many slums lack basic local authority services such as provision of safe drinking water, wastewater, sanitation, and solid-waste management.

Windows Anytime Upgrade

Anytime Upgrade packaging for Windows 7 at retail. The packaging, however, would only include a license for the edition to be upgraded, as Anytime Upgrade in

Windows Anytime Upgrade (Add Features to Windows) was a service by Microsoft introduced in Windows Vista that facilitated upgrades across successive editions of Windows Vista. Prices for upgrades purchased through Windows Anytime Upgrade were lower than prices for upgrades purchased at retail.

Windows Anytime Upgrade is included in Windows 7 to allow users to upgrade to Windows 7 editions. In Windows 8 and Windows 8.1 it was rebranded as Add Features to Windows and was used to purchase an upgrade license for the Pro edition or to add Windows Media Center to an existing Pro installation. Support for this feature was discontinued on October 31, 2015.
