Do Androids Dream of Electric Sheep?

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film *Blade Runner* One of The Atlantic's Great American Novels of the Past 100 Years By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can't afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They've even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding, unauthorized androids live among human beings, undetected. Rick Deckard, an officially sanctioned bounty hunter, is commissioned to find rogue androids and "retire" them. But when cornered, androids fight back—with lethal force. Praise for Philip K. Dick "The most consistently brilliant science fiction writer in the world."—John Brunner "A kind of pulp-fiction Kafka, a prophet."—The New York Times "[Philip K. Dick] sees all the sparkling—and terrifying—possibilities . . . that other authors shy away from."—Rolling Stone

The Popular & the Canonical

This volume ranges from the Second World War to the postmodern, considering issues of the 'popular' and the competing criteria by which literature has been judged in the later twentieth century. As well as tracing the transition from modernism to postmodernism, the authors guide students through debates around the pleasures of the popular and the question of inter-relations between 'mass' and 'high' cultures. Drawing further upon issues of value and function raised in *Aestheticism and Modernism: Debating Twentieth-Century Literature 1900-1960*, they examine contemporary literary prizes and the activity of judgement involved in English Studies. This text can be used alongside the other books in the series for a complete course on twentieth-century literature, or on its own as essential reading for students of mid to late twentieth-century writing. Texts examined in detail include: du Maurier's *Rebecca*, poetry by Ginsburg and O'Hara, Dick's *Do Androids Dream of Electric Sheep?*, Puig's *Kiss of the Spiderwoman*, Beckett's *Waiting for Godot*, Heaney's *New Selected Poems 1966-1987*, Gurnah's *Paradise*, Barker's *The Ghost Road*.

Do Androids Dream of Electric Sheep?

Science fiction writer Philip K. Dick (1928-1982) is the giant imagination behind so much recent popular culture--both movies directly based on his writings, such as *Blade Runner* (based on the novel *Do Androids Dream of Electric Sheep?*), *Total Recall*, *Minority Report*, and *The Adjustment Bureau* plus cult favorites such as *A Scanner Darkly*, *Imposter*, *Next*, *Screamers*, and *Paycheck* and works revealing his powerful influence, such as *The Matrix* and *Inception*. With the much anticipated forthcoming publication in 2011 of volume 1 of *Exegesis*, his journal of spiritual visions and paranoid investigations, Dick is fast becoming a major influence in the world of popular spirituality and occult thinking. In *Philip K. Dick and Philosophy: Who Adjusts the Adjustment Bureau?*, twenty Dick fans and professional thinkers confront the fascinating and frightening ideas raised by Dick's mind-blowing fantasies. Is there an alien world behind the everyday reality we experience? If androids can pass as human, should they be given the same consideration as humans? Do psychotics have insights into a mystical reality? Would knowledge of the future free us or enslave us? This volume will also include Dick's short story "Adjustment Team," on which *The Adjustment Bureau* is based. *Philip K. Dick and Philosophy* explores the ideas of Philip K. Dick in the same way that he did: with an earnest desire to understand the truth of the world, but without falsely equating earnestness with a dry seriousness. Dick's work was replete with whimsical and absurdist presentations of the greatest challenges to reason and to humanity--paradox, futility, paranoia, and failure--and even at his darkest times he was able to keep some perspective and humor, as for example in choosing to name himself 'Horselover Fat' in *VALIS* at the same time as he relates his personal religious epiphanies, crises, and delusions. With the same earnest whimsy, we approach Philip K. Dick as a philosopher like ourselves--one who wrote almost entirely in thought-experiments and semi-fictional world-building, but who engaged with many of the greatest questions of philosophy throughout the Euro-American tradition. *Philip K. Dick and Philosophy* has much to offer for both serious fans who have read many of his novels and stories, and for those who may have just recently learned his name, and realized that his work has been the inspiration for several well-known and thought-provoking films. Most chapters start with one or more of the movies based on Dick's writing. From here, the authors delve deeper into the issues by bringing in philosophers' perspectives and by bringing in Dick's written work. The book invites the reader with a casual familiarity with Dick to get to know his work, and invites the reader with little familiarity with philosophy to learn more. At the same time, we have new perspectives and challenging connections and interpretations for even the most hard-core Dick fans, even though we never speak to "insiders" only. To maximize public interest, the book prominently addresses the most widely-known films, as well as those with the most significant fan followings: *Blade Runner*, *Total Recall*, *Minority Report*, *A Scanner Darkly*, and *The Adjustment Bureau*. Along with these "big five" films, a few chapters address his last novels, especially *VALIS*, which have a significant cult following of their own. There are also chapters which address short stories and novels which are currently planned for adaptation: *Radio Free Albemuth* (film completed, awaiting distribution), *The Man in the High Castle* (in development by Ridley Scott for BBC mini-series), and "King of the Elves" (Disney, planned for release in 2012).

Do Androids Dream of Electric Sheep? Filmed as Blade Runner

A poetic exploration of the new world created by the collision of the biological body with technology and culture. For more than 3,000 years, humans have explored uncharted geographic and spiritual realms. Present-day explorers face new territories born from the coupling of living tissue and metal, strange lifeforms that are intelligent but unconscious, neither completely alive nor dead. Our bodies are now made of machines, images, and information. We are becoming cultural bodies in a world inhabited by cyborgs, clones, genetically modified animals, and innumerable species of human/information symbionts. Ollivier Dyens's *Metal and Flesh* is about two closely related phenomena: the technologically induced transformation of our perceptions of the world and the emergence of a cultural biology. Culture, according to Dyens, is taking control of the biosphere. Focusing on the twentieth century—which will be remembered as the century in which the living body was blurred, molded, and transformed by technology and culture—Dyens ruminates on the undeniable and irreversible human/machine entanglement that is changing the very nature of our lives.

Do Androids Dream of Electric Sheep Omnibus

In laboratories all over the world, life -- even the idea of life -- is changing. And with these changes, whether they result in square tomatoes or cyborgs, come transformations in our social order -- sometimes welcome, sometimes troubling. *Changing Life* offers a close look at how the mutable forms and concepts of life link the processes of science to those of information, finance, and commodities. These essays -- about planetary management and genome sequencing, ecologies and cyborgs -- address actual and imagined transformations at the center and at the margins of transnational relations, during the post-Cold War era and in times to come.

The Cambridge Companion to Literature on Screen

Apocalyptic AI, the hope that we might one day upload our minds into machines or cyberspace and live

forever, is a surprisingly wide-spread and influential idea, affecting everything from the world view of online gamers to government research funding and philosophical thought. In *Apocalyptic AI*, Robert Geraci offers the first serious account of this \"cyber-theology\" and the people who promote it. Drawing on interviews with roboticists and AI researchers and with devotees of the online game *Second Life*, among others, Geraci illuminates the ideas of such advocates of Apocalyptic AI as Hans Moravec and Ray Kurzweil. He reveals that the rhetoric of Apocalyptic AI is strikingly similar to that of the apocalyptic traditions of Judaism and Christianity. In both systems, the believer is trapped in a dualistic universe and expects a resolution in which he or she will be translated to a transcendent new world and live forever in a glorified new body. Equally important, Geraci shows how this worldview shapes our culture. Apocalyptic AI has become a powerful force in modern culture. In this superb volume, he shines a light on this belief system, revealing what it is and how it is changing society.

Metal and Flesh

Seminar paper from the year 2006 in the subject American Studies - Literature, grade: 1,00, Catholic University Eichstätt-Ingolstadt (Sprach- und Literaturwissenschaftliche Fakultät), course: Novel and Film, language: English, abstract: \"Do Androids Dream of Electric Sheep?\" is one out of at least six novels by Philip K. Dick that deal substantially with the questions surrounding androids. It is exactly the distortion between the real as the jumping-off point cited above and the hypothetical, unreal, fictional which creates a critical comment on the world the present reader lives in. The special focus on humanlike androids in \"Do Androids Dream of Electric Sheep\" implies a particular philosophical issue. Of course, the somewhat murky, obscure and intransparent depiction of androids involves the problem of man-machine relationships, which can to a certain extent be equated with human-android relationships. But Dick goes a step further, pointing out the differences as well as the parallels between both the android and the human being, using ambiguous descriptions and playing with the reader's sympathy for both sides. One could even argue that Dick tried to create a kind of meeting halfway between man and android. Certainly, Dick himself faces difficulties when trying to define the android as \"a thing somehow generated to deceive us in a cruel way, to cause us to think it to be one of ourselves.\" This description meets exactly to core of our analysis, which deals with the impact and the effects created by this somewhat ambiguous representation of human and android life.

A Twentieth-century Literature Reader

The all-new essays in this book respond to the question, How do spaces in science fiction, both built and unbuilt, help shape the relationships among humans, other animals and their shared environments? Spaces, as well as a sense of place or belonging, play major roles in many science fiction works. This book focuses especially on depictions of the future that include, but move beyond, dystopias and offer us ways to imagine reinventing ourselves and our perspectives; especially our links to and views of new environments. There are ecocritical texts that deal with space/place and science fiction criticism that deals with dystopias but there is no other collection that focuses on the intersection of the two.

Do Androids Dream of Electric Sheep Vol 4

Before Humanity takes up the question of the post- in the posthuman from the position of ancestry. Speculating about who or what comes after the human inevitably throws us back to our very beginnings. The before in Before Humanity in this context takes on two meanings: 1) what happened before we apparently

became human? – which translates into a critical reading of paleo-anthropology, as well as evolutionary narratives of hominization; 2) living through the end of a certain (humanist, anthropocentric) notion of humanity, what tasks lie before us? – which provokes a critical reading of the Anthropocene and current narratives of geologization. In other words, *Before Humanity* investigates conceptualizations of humanity and asks whether we have ever been human and if not, what could, or maybe what should we have been?

Do Androids Dream of Electric Sheep?

Since its release in 1982, Ridley Scott's *Blade Runner*, based on Philip K. Dick's novel *Do Androids Dream of Electric Sheep?*, has remained a cult classic through its depiction of a futuristic Los Angeles; its complex, enigmatic plot; and its underlying questions about the nature of human identity. *The Blade Runner Experience: The Legacy of a Science Fiction Classic* examines the film in a broad context, examining its relationship to the original novel, the PC game, the series of sequels, and the many films influenced by its style and themes. It investigates *Blade Runner* online fandom and asks how the film's future city compares to the present-day Los Angeles, and it revisits the film to pose surprising new questions about its characters and their world.

Do Androids Dream of Electric Sheep?

Philip K. Dick, the visionary author behind *Blade Runner*, is the most adapted science fiction writer in cinema history. For the still-unequalled future world of *Blade Runner* to the mind-bending *A Scanner Darkly*, via the blockbusting action/adventure of *Total Recall*, *Paycheck* and *Minority Report* – not to mention the debt of gratitude films like *The Matrix* and *The Truman Show* owe to his work – the legacy of Philip K. Dick has revolutionised Hollywood. Illustrated with rare photos, *Counterfeit Worlds* is the first book to trace the history of Philip K. Dick screen adaptations, both in cinema and on television.
